

2022 MARKET DATA TRANSPARENCY OBLIGATION DISCLOSURES

PUBLISHED IN MAY 2023

MTS SpA, EuroMTS Limited & MTS
France SAS ("MTS")

1. Introduction

The transparency obligation set out in Article 11 of Commission Delegated Regulation (EU) 2017/567 of 18 May 2016, as published in the Official Journal of the European Union on 31 March 2017 (“the Delegated Act”), requires that “Market operators and investment firms operating a trading venue and systematic internalisers shall disclose the price and other terms and conditions for the provision of the market data in a manner which is easily accessible to the public” and makes certain specifications with regard to the contents of this disclosure.

This document incorporates the relevant disclosures as set out in the Delegated Act, with the exception of current price lists and the terms and conditions, which, as detailed below, can be separately accessed on the MTS website.

All data generated from markets operated by MTS is pooled and commercialised by EuroMTS Limited. MTS SpA and MTS France S.A.S have dedicated commercial agreements with EuroMTS for this purpose. Other market operators such as MTS Associated Markets SA and BondSpot SA, which are not part of the MTS Group (but whose markets are run on the same technology) also have commercial data distribution agreements in place with EuroMTS Limited. EuroMTS Limited collates data from the above markets and develops them into packages that are then distributed via vendors or directly to end-users, as detailed in the MTS Data Documents and Fee Schedules.

2. Disclosures

Legal Basis	Contents
<i>Article 89(2)(a) of Delegated Regulation (EU) No2017/565 and Article 11(2)(a) of Delegated Regulation (EU) No 2017/567</i>	<p>Price List: Year 2023</p> <p>Current price lists for MTS Market Data are contained within the Fee Schedules, publicly accessible at: www.mtsmarkets.com/resources/market-data. 	Market Data Revenues as a proportion of total Revenues (%)	4%		

¹ Average Daily Volume

² Pre-trade: number of quotes (for Cash Markets)/ number of requests (for Bond Vision). Post trade: number of trades (for Cash Markets)/ number of tickets executed

Information on cost accounting methodology	
<p>Article 89(2)(e) of Delegated Regulation (EU) No 2017/565 and Article 11(2)(e) of Delegated Regulation (EU) No 2017/567</p>	<p>Information on how the price was set, including the cost accounting methodologies used and information about the specific principles according to which direct and variable joint costs are allocated and fixed joint costs are apportioned</p> <p>Costs are apportioned in line with the methodology described below.</p> <p><u>Methodology</u> Costs are grouped in three categories: direct costs, common costs and joint costs.</p> <p>Direct costs are specifically incurred to run the MTS Market Data business. These costs are allocated in total to the MTS Market Data business and are then split equally between MiFID and non-MiFID Data product lines.</p> <p>Common costs represent the internal services that are necessary to support the MTS Market Data business. These are aggregated and allocated equally across key products lines. The total Data allocation is then split equally between MiFID and non-MiFID product lines.</p> <p>Joint costs are those incurred in running the Market Data and Trading businesses concurrently, given that, due to their nature, it is not possible to offer either of these services in isolation.</p> <p><u>Direct costs</u> The following are the key direct costs for the MTS Market Data business:</p> <ul style="list-style-type: none"> • Staff costs • Cost of sales • Marketing fees • Professional fees & Other <p><u>Common costs</u> The following are the key indirect costs allocated to the MTS Market Data business:</p> <ul style="list-style-type: none"> • Staff costs • Marketing & T&E • Professional Fees & Other • Property costs • Group IT infrastructure costs • Group support function costs <p><u>Joint costs</u> The MTS Trading and Market Data businesses are jointly produced services: a single technology platform (one each for Cash and BondVision) facilitates both trading activity and data production and it is not possible to offer one service without the other. MTS allocates platform costs equally between its trading and market data businesses. The total data allocation is then split equally between MiFID and non-MiFID product lines.</p> <p>No margin is added to the costs in order to set the price. This business line is currently loss making.</p>
