## 02 Technological innovation

### Technology

- **Scalability:** structure of MTS Cash allows for new markets and bonds to be added easily, allowing it to grow with the market
- **Capacity:** markets have continued to evolve with the addition of new instruments and structures while MTS Cash platforms remain robust and reliable
- **Performance:** the average round trip time of transactions is currently less than 0.3 milliseconds

### CMF - Latency

### Connectivity

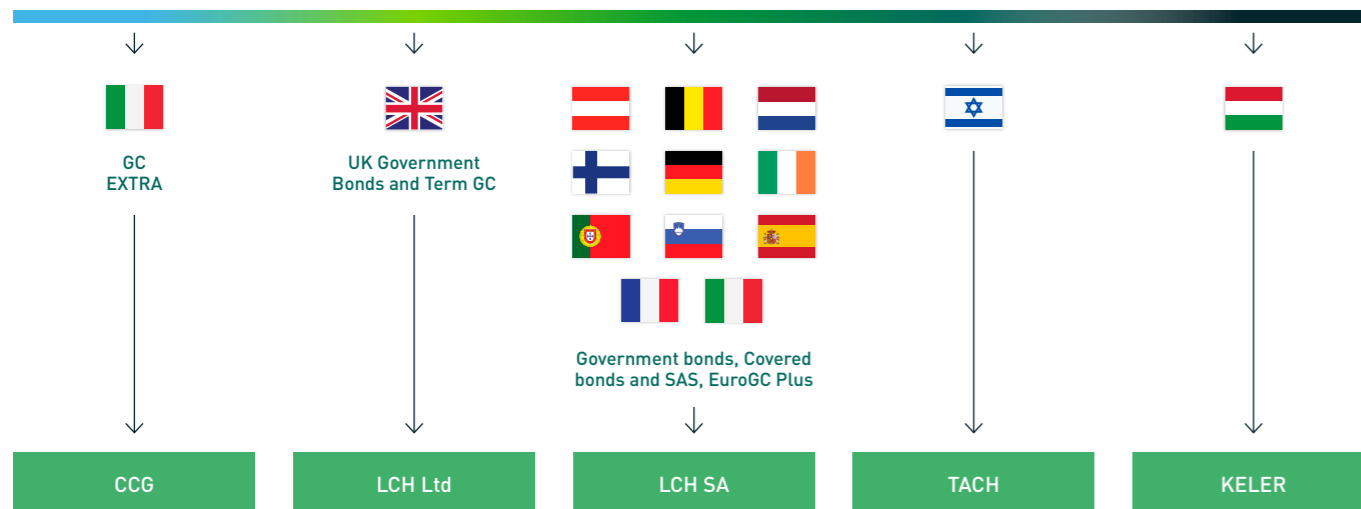

- Platforms can be accessed either via leased line connectivity or public internet
- MTS provides a standard GUI allowing traders to connect to markets
- Members can implement more sophisticated solutions (e.g. auto-quote applications) or integrate MTS trading functionality within their existing applications (e.g. deal-capture for risk management systems)
- Effective and rapid communication with MTS through native SDP or FIX protocol

Official network service providers for leased line connectivity:

- Borsa Italiana BitNet
- BT Radianz
- Colt PrizmNet
- Fixnetix
- SIA

## Straight Through Processing

- Details of members' settlement accounts at CSDs/ICSDs are registered in the MTS database
- The two instructions created for each trade are always identical and are automatically matched, eliminating any potential post-trade discrepancies, mismatching errors and potential fails
- Copies of these messages can be sent to custodian banks for reconciliation purposes
